

Response to Questions regarding Request for Proposals: Best Practices for Energy Efficiency and Health in K-12 Schools

NASEO received two requests for an extension of the deadline for this Request for Proposals. In response, NASEO will extend the deadline from 5:00 p.m. ET on Tuesday, September 7, 2021 to 5:00 p.m. ET on Friday, September 10, 2021.

Question: DOE FOA and NASEO's scope: We would like to learn about the original DOE FOA and NASEO's scope for the project. Is it possible to share the DOE FOA and NASEO's SOPO or any documents with us so we could better understand the project?

Response: Supplementary information is not available at this time. The Request for Proposals document contains all of the information necessary to respond.

Question: Performance targets: For tasks 1 through 3 on page 3 of the RFP, are there specific numerical performance targets (i.e. number of schools recruited, number of different states reached, number of networking events, number of materials produced, etc.) associated with these tasks and subtasks that will be expected under the subcontract work? If so, what are the performance targets for the applicable tasks and subtasks?

Response: Numerical targets should be suggested by bidders for the subcontract award. The number of state energy offices engaged will be driven by the number of states which volunteer to work with NASEO and the subcontract awardee. The development of materials and resources will be determined by the needs of the State Energy Offices and other stakeholders.
